

### Assignment no 3 a)

Step 1 create a folder

2 open cmd in it

3 write npm init

4 hit enter multiple times

5 install express –save

6 after that open the folder in vs code

7 create app.js file

```
Const express=require('express');
```

```
Const app= express()
```

```
App.use(express.static('public'))
```

```
App.listen(4000,()=>{
```

```
Console.log("server is started")
```

```
})
```

8 create a public folder

9 inside public folder create index.html

10 write something in it

11 open your terminal again and type

```
Node app.js
```

12 after that open browser and type

```
Localhost:4000
```
